Internship Overview

Role: Data Analyst

Internship period: 03 September 2026 – 16 September 2026

Work arrangement: generally remote, with fieldwork if required

Focus: NGO data compilation, NLP/social-impact analysis, opportunity research and professional documentation

Task 1 — NGO Data Compilation

Compiled 10 Indian NGOs in a structured spreadsheet.

Fields: NGO name, website, area of work, headquarters and key initiatives.

Organizations span education, child welfare, nutrition, conservation, elderly care, community development and other social-impact areas.

Outcome: a reusable reference dataset for NGO comparison.

Task 1 — NGOs 1–5

1. Smile Foundation — Multi-Sector — New Delhi
2. Pratham Education Foundation — Education — Mumbai
3. Child Rights and You (CRY) — Child Rights and Welfare — Mumbai
4. The Akshaya Patra Foundation — Nutrition & Education Support — Bengaluru
5. Goonj — Community Development & Disaster Relief — New Delhi

Task 1 — NGOs 6–10

6. HelpAge India — Healthcare & Elderly Care — New Delhi
7. Wildlife SOS — Environmental Conservation & Animal Welfare — New Delhi
8. Naye Pankh Foundation — Youth-Driven Multi-Cause Developmen — Kanpur, Uttar Pradesh
9. Project Nanhi Kali — Girl Child Education — Mumbai
10. Basti Ki Pathshala Foundation — Slum-Level Primary Education — New Delhi

Task 2 — NLP for NGO Impact

Traditional assessment can involve manual qualitative coding, annual surveys and delayed feedback.

NLP can process beneficiary interviews, casework notes and community feedback at scale.

Core applications: sentiment analysis, automated survey coding and social listening for crisis alerts.

Task 2 — Opportunities & Challenges

Opportunities: automated field reporting, multilingual community access, dashboard integration and text normalization.

Challenges: regional idioms and low-resource languages, privacy/security, and algorithmic bias.

Recommended safeguard: human-in-the-loop review before important programme or resource decisions.

Task 2 — Indian Examples

CivicDataLab — data, technology and research for public decision-making.

Dasra — data-driven philanthropy and social-sector insights.

Pratham — large-scale education measurement and learning-outcome work.

AI assistance was used for information structuring and analytical comparison.

Task 3 — Opportunity Data Compilation

NEW / UPDATED TASK COMPLETED

15 opportunities compiled in the submitted Task 3 document.

Columns: organization, opportunity type, eligibility, application link, deadline and stipend.

Includes NGO volunteering, internships, fellowships, conservation roles and government programmes.

The list includes both paid and unpaid opportunities.

Deadlines are recorded exactly as provided, including 'Not Specified', 'Check Portal' and periodic application notes.

Eligibility ranges from open volunteer roles to graduate/final-year and age-specific fellowships.

Important: listing an opportunity does not mean an application was submitted or participation occurred.

Task 4 — Fundraising

The offer letter describes fundraising as a secondary responsibility linked to the internship stipend.

It also states that fundraising is optional for achieving the completion certificate.

Expected activity: create/share a stationery-support appeal and encourage small contributions.

Updated archive contains no donation receipt, transaction screenshot, donor record or verified amount raised.

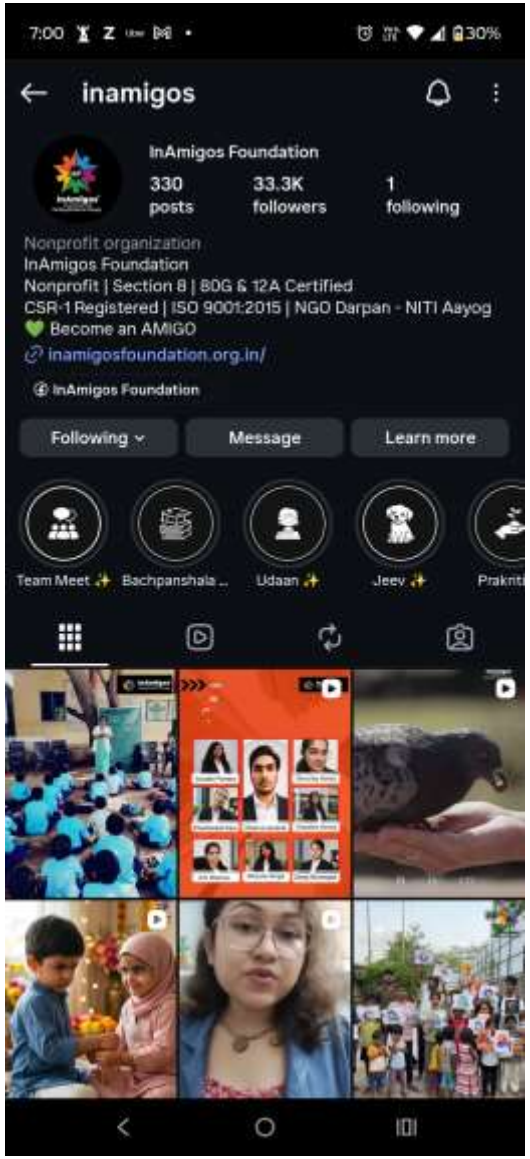

Task 4 — Evidence-Based Status

Status in this report: fundraising outcome NOT claimed.

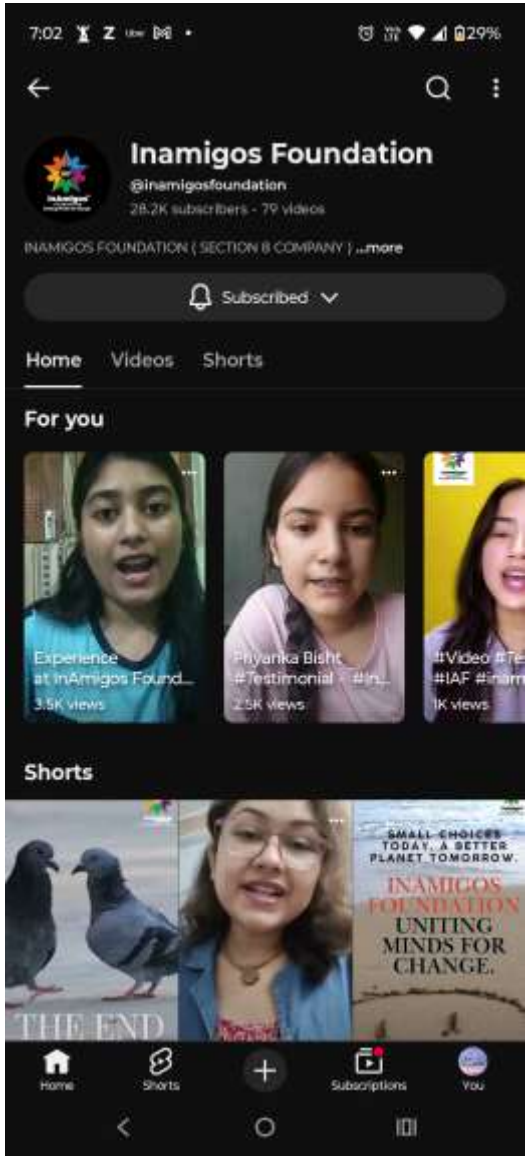

No donation amount or donor has been invented.

Any future donation result should be supported by genuine transaction/receipt evidence before being added to the final report.

Skills & Learning Outcomes

Data organization and table design

Research and opportunity-data compilation

NLP concepts and social-impact analysis

Comparative reasoning and concise analytical writing

Evidence-based reporting and responsible AI/data practices

Professional communication and presentation

Overall Conclusion

Task 1 built a structured NGO reference dataset.

Task 2 connected NLP concepts with practical NGO impact measurement.

Task 3 expanded the work into a 15-entry opportunity dataset with application details.

Task 4 is transparently documented without unsupported donation claims.

Overall learning: combine data skills with careful verification, communication and responsible reporting.

Thank You
